Summary

Aspiring Quality Analyst with hands-on project experience in Manual and Automation Testing using Java, Selenium WebDriver, TestNG, Cucumber, and Maven. Strong understanding of SDLC, STLC, test case design, bug reporting and defect tracking using Jira. Familiar with API testing using Postman, Git & GitHub, and Jenkins CI/CD.

Projects

Selenium Automation Project: Prestashop Demo [GitHub- github.com/Abhishek-CD/Automation-Prestashop](https://github.com/Abhishek-CD/Automation-Prestashop)

- Implemented an end-to-end Automation Testing Framework from scratch using Java, Selenium WebDriver, and TestNG for the PrestaShop e-commerce application.
- Applied data-driven testing using Excel/Apache POI, OOP concepts, Cucumber BDD, reusable test setup and explicit waits for reliable test execution.
- Configured parallel test execution using TestNG multi-threading and dynamic browser parameterization, cutting total regression execution time by over 50%.

Manual Testing Project: LetCode [GitHub- github.com/Abhishek-CD/QA-Manual-Testing-LetCode](https://github.com/Abhishek-CD/QA-Manual-Testing-LetCode)

- Executed end-to-end manual testing across Windows and Android environments on major web browsers.
- Designed and executed 139 test cases with an 88% pass rate, covering functional, non-functional, usability, and UI testing.
- Developed QA documentations including Test Plans, Test Case Suites, Test Execution Reports, and Defect Reports.

QA Playground Web Application (justqaplayground.pythonanywhere.com/)

GitHub- github.com/Abhishek-CD/QA-playground-web-app

- Built a full-stack web application (Python-Django, HTML, CSS, JavaScript) end-to-end using Google Antigravity AI IDE, leveraging 100% AI-assisted development workflows.
- Integrated prompt engineering techniques to generate test suites, seed dynamic mock data, and accelerate application feature development.

Frontend Development Projects

- Designed, developed and hosted a responsive personal portfolio website. (abhishekcdd-portfolio.netlify.app)
- Built a practice project using HTML, CSS, and JavaScript to understand REST API integration, process product data from an external API. (htmlapicard.netlify.app/)
- Recreated the Facebook login UI using HTML and CSS for frontend practice. (fbloginfrontend.netlify.app/)

Training/Certifications

AI-Powered Software Testing– Illinois Tech US, Entri Software Pvt Ltd, NSDC

- Built automation frameworks using Selenium WebDriver, TestNG, Page Object Model (POM), and Cucumber BDD.
- Gained hands-on experience in Manual Testing, SQL, Core Java, Selenium WebDriver, TestNG, Cucumber, Maven, Jenkins, JMeter and Postman.

Core Skills

- **Manual Testing** – SDLC, STLC, Test Scenario Design, Test Case Design, Test Execution, Defect Life Cycle, Bug Reporting
- **Automation Testing** – Selenium WebDriver, TestNG, Maven, Cucumber
- **Programming Languages** – Java, Python
- **Database Management** – MySQL
- **Tools** – Git, GitHub, Jira, Postman, Apache JMeter, BrowserStack, Katalon Studio

Education

Bachelor of Technology- Computer Science Engineering
SCMS School of Engineering and Technology, Ernakulam

(2020 – 2023)

Diploma in Computer Engineering
Govt. Polytechnic College, Kunnampalam

(2017 – 2020)
